EDUCATION

Bachelor of Computer Science – Computer Science Co-op
Concordia University, Montreal, QC

2022 - 2026 (Expected)

WORK EXPERIENCE

Software Developer Intern
Flexspring (Boston, USA)

Sep 2024 - Dec 2024

- Tackled production-level bugs and improvements in existing **Java** services, as well as implemented new features on the company's main product, using **Jira** to track and manage development tasks
- Worked within **SCRUM** methodology, using **Git** for version control and **GitBucket** for repository management
- Refactored code to simplify logic, optimize performance, and eliminate unused legacy code, improving efficiency and maintainability

Math tutor

Sep 2023 - May 2024

Concordia University (Montreal, Canada)

- Worked in the university's math department, providing one on one tutoring and organizing *Exam Prep* (comprehensive review) sessions
- Gauged students' level and needs in order to provide personalized advice and explain the content in a clear and concise way
- Tutored several math courses, such as Linear Algebra, Calculus I, Calculus II, etc.

Software Developer Intern

May 2023 - Aug 2023

Federal Highway Police (Brasília, Brazil)

- Designed and implemented data aggregation tools with **Python** and **PostgreSQL** that were used on a federal scale, improving efficiency country-wide by over 10%
- Developed several automation scripts, browser extensions and small-scale applications using **JavaScript**, reducing the time spent on routine tasks by half
- Realized the implementation of new tools in different departments, as well as assisting them with software and computed related problems

PROJECTS/RELEVANT EXPERIENCE

Director of Technology at club HackConcordia

2024

- Participated the development and maintenance of the club's website and registration platform
- Contributed to the [backend] software development and maintenance of several projects within the club
- Technologies used: TypeScript, MongoDB, Express JS

Progressive Web Application

JavaScript, Firebase, Svelte

- Downloadable communication tool with user authentication, groups creation, in-app chat, public activity status, dashboard to navigate between groups and link other social medias to profile

Data scraper

Docker, MySQL, Python

- Designed and implemented a Python script that scrapes all mentions of every LeetCode problem on Reddit, and saves it to a MySQL database that feeds a website where users can visualize the most frequent problems and solve them

SKILLS

Programming languages | Java • Python • JavaScript/TypeScript • Go • C • Bash

Databases | PostgreSQL • MySQL • Firebase • MongoDB

Technologies | Git • Docker • Google Cloud • AWS • Node.js • Django • Linux/Unix • NumPy • Jira • Jenkins

Languages | English • Portuguese • Spanish • French
